About This Report

It is broadly accepted that SMEs are the basis of the economy, of our country's economy. Whether they are micro or small entities they hold important positions. They also have unique challenges including the inability to institutionalize sufficiently and they have problems with financing and in finding qualified labour. Moreover, a more structural issue often accompanies these problems – SMEs are often unable to evaluate their current positions and to provide sufficient information to express themselves.

To address this, KOSGEB developed the Enterprise Assessment Report using the records various administrations and institutions keep (according to their legislation). This tool will help illuminate the current situation of the SME, and provide a data report for them to present themselves.

The report lets the enterprise compare itself with the industry throughout Türkiye and its statistical regions. The report will enable enterprises to make plans and programs according to their place in the sector, as well as to help them to follow their development and manage their resources efficiently according to the plans made in the previous year.

In the upper right corner of each chart or table, there are abbreviations for the institutions from which the data was taken.

This report has been prepared for informational purposes and is not an official document. KOSGEB is not responsible for the accuracy, timeliness, and authenticity of administrative records obtained through web services from institutions and organizations. The report doesn't include any interpretations by KOSGEB. Since the report consists of data obtained from various institutions and organizations, the diversity of the data and the differences in the approaches of the institutions obliged us to make some assumptions. So, the following points should be considered when reviewing the report:

• The declarations made by the enterprises to the relevant institutions and organizations are assumed to be correct.

• Sectoral analyses has been done using NACE Rev.2 six-digit codes. The outliers removed from the data when calculating averages using the interquartile range rule.

• Enterprises that do not have data for a particular chart are not included in the sector average. For example, when calculating the sectoral export averages, only the data of exporting enterprises are taken into consideration.

• The main sector information of the enterprise was obtained from the Revenue Administration. For enterprises operating in more than one sector, only the first five items are shown in the report.

• If the number of enterprises is six or below, in order to protect the anonymity of the enterprises, sector averages are not reflected in a chart.

• The report is based on the sector in which the enterprise operated last year and its tax accounting method.

• In case the enterprises have got capacity utilization ratios for more than one workplace, those ratios were merged by weighting with the turnover value of each workplace for each enterprise.

• The total number of enterprises in the General Rankings chapter has been calculated by considering only the enterprises with data for that related variable.

Please send an e-mail to idr@kosgeb.gov.tr for your comments and suggestions.

Earnings Before Interest, Tax, Depreciation, and Amortization (RATIO)

RA

Earnings Before Interest, Tax, Depreciation, and Amortization - EBITDA is an important indicator not only for profitability performance but also for business purchases. Since it presents the earning potential of the business, it hints the business value in the most general way. A high rate affects the market value of the enterprise positively.

*EBITDA: Earnings Before Interest, Tax, Depreciation, and Amortization

The Enterprise Assessment Report was produced using the data which belong to the periods given in the report and which were procured from the relevant organisations and institutions. Each section title in the Report also displays its data source on the right. KOSGEB and KKB Kredi Kayit Burosu A.S. are not responsible for the accuracy of the externally obtained data. You can communicate any of your objections about the correctness of the data with KOSGEB, either by sending an e-mail to idr@kosgeb.gov.tr address or by calling KOSGEB Call Centre on 444 1 467.
