The New Meeting Point of the Chemical Industry:

AZERBAIJAN

TurkchemAZ is preparing to bring the chemical industry together in Baku, the strategic hub of Azerbaijan. With its strong energy infrastructure, petrochemical-focused industrial base, rich raw material potential, and regional accessibility, Azerbaijan is emerging as a new center for trade and investment in the chemical sector.

TurkchemAZ, brought to life with the strong legacy of the Turkchem brand across Eurasia and the specialized exhibition expertise of Artkim, is not just a trade fair where products are displayed; it will serve as an international business platform where manufacturers, suppliers, investors, and decision-makers come together to establish new collaborations.

The Strategic Power of Baku

Positioned between East and West, Baku is a strong hub for access to the Caucasus, the Caspian Basin, Central Asia, and surrounding markets.

Industrial and Incentive Advantage

Azerbaijan offers a strong foundation for investments in chemical, petrochemical, and export-oriented production with the Sumgait Industrial Park and the Alat Free Economic Zone.

A New Regional Trade Gateway

TurkchemAZ is an effective meeting point not only for companies targeting Azerbaijan, but also for those seeking to access a broader regional trade network.

WHY TURKCHEM AZERBAIJAN?

Turkchem Stage is preparing to become the voice of the industry!

Turkchem Stage brings together key speakers and industry professionals on the same stage. While current topics and future perspectives come to the forefront in panel sessions, B2B meetings accelerate new business connections. In this way, TurkchemAZ stands out not only as a platform where products are showcased, but also where ideas are shared and commercial interactions are strengthened.

Access to a 300 Million Market

Baku's strategic location provides access to a population of approximately 300 million across the Caucasus, the Caspian Basin, Central Asia, Türkiye, and surrounding markets.

Regional Reach Power

Baku, with its reach extending to Türkiye, the Caucasus, Central Asia, and surrounding markets, offers a strategic advantage for companies seeking to establish new business connections.

New Collaborations

TurkchemAZ brings together manufacturers, distributors, technology providers, suppliers, and investors on the same platform, creating direct opportunities for commercial engagement.

Strong Brand Infrastructure

The strong industry recognition of the Turkchem brand, combined with Artkim's international exhibition expertise, provides TurkchemAZ with a solid brand foundation.

All Components of the Chemical Industry **Under One Roof!**

TurkchemAZ aims to bring together various segments of the chemical industry on a single platform, including chemicals, petrochemicals, specialty chemicals, laboratory and production technologies, process equipment, measurement, testing and analysis systems, and industry services. It will also showcase products, raw materials, and solutions for the pharmaceutical, cosmetics, composite, and coatings industries. This structure not only unites different areas of expertise within the sector, but also presents a comprehensive framework aligned with the product groups featured in existing Turkchem brochures.

Visitor Profile

- Automotive and Transportation Industry Professionals
- Biotechnology
- Ceramics, Glass, Enamel
- Composite Product Manufacturers
- Construction and Infrastructure Companies
- Construction Chemicals and Adhesives
- Defense and Aerospace Industry Representatives
- Distributors, Suppliers and Dealers
- Energy and Industrial Manufacturing Companies
- Environment and Occupational Safety Sector
- Household and Industrial Cleaning
- Industrial Oils and Gases
- Laboratory Equipment and Instrument Manufacturers
- Packaging Industry
- Paint and Coating Manufacturers
- Pharmaceutical Manufacturers
- Plastics and Rubber
- Process Technologies
- Production and Operations Managers
- Procurement and Supply Chain Managers
- Quality Control and Laboratory Professionals
- R&D, Formulation and Product Development Teams
- Regulation and Technical Compliance Teams
- Research and Development
- Soil Products and Mining
- Storage and Logistics
- Textile and Leather Chemicals
- Universities and Public Institutions
- Water Treatment
- Others

Exhibitor Profile

- Agricultural Chemicals
- API and Excipients Suppliers
- Coatings and Paint Raw Materials
- Composites Raw Material Suppliers
- Construction Chemicals
- Contract Manufacturing, Toll Manufacturing and Private Label Companies
- Cosmetic Raw Materials and Active Ingredient Manufacturers
- Flavors, Fragrances and Formulation Companies
- Food and Flavor
- Formulation and Production Technologies Companies
- Industrial Gases
- Inorganic Chemicals
- Laboratory, Analysis, Testing and Quality Control Solutions
- Laboratory Technologies
- Logistics and Distribution Services
- Measurement, Testing and Analysis Technologies
- Molding, Production and Application Solution Providers
- Organic Chemicals
- Other Chemicals
- Packaging, Filling and Packing Systems
- Personal Care Ingredients Suppliers
- Petrochemicals
- Pharmaceutical and Biochemistry
- Pigment, Resin and Additive Suppliers
- Plastics and Polymers
- Process Equipment and Automation Companies
- Production, Filling and Packaging Technologies Companies
- Resin, Fiber and Additive Material Manufacturers
- Semi-Finished and Intermediate Product Manufacturers
- Specialty Chemicals and Formulation Companies
- Textile Chemicals
